

From Epoch Times

The original Moderna clinical trial data, which should have been available to regulatory agencies at least since the Moderna package was presented for licensure, [reveals](#) that while **93% of unvaccinated controls** produced the SARS-CoV-2 anti-nucleocapsid antibody after infection, only **40% of the vaccinated** produced this antibody at detectable levels after infection.

They failed to mount the expected immune response. It is possible or probable that the more doses of these vaccines you receive, the less broad immunity you will develop, even after getting infected.
