

Published by John Casey

Casey received his B.S in physics and math from Jacksonville State

- all high temperature records were set in 1930s before the rise of CO2
- ;- global cooling has been in effect since 1998, according to ground and satellite measurements;
- both the Arctic and Antarctic ice sheets are growing;
- CO2 is incapable of causing global warming (given that it constitutes 38/1000th of 1 percent of atmospheric gases);
- there is no correlation between CO2 and temperature;
- CO2 follows temperature rather than preceding or causing it;
- the sea level is rising (Seattle in specific) and falling (US Pacific Northwest in general) depending on where you are, and that the sea is rising at a very slow and constant rate;
- extreme weather (such as hurricanes) has not increased;
- snowfall has increased across the US; and
- that the oceans are still very alkaline (pH 8.2) not acidic.

*“Global surface temperatures have not risen in 15 years. They make the high estimates unlikely.” (As of 2016)*

NASA says Ice Caps Growing larger 2016 to 2019.

“When objective NASA satellite data, reported in a peer-reviewed scientific journal, show a ‘huge discrepancy’ between alarmist climate models and real-world facts, climate scientists, the media and our elected officials would be wise to take notice.

Dr. Karlstrom, who also manages a **website**, went on to explain the “global warming” hysteria, and it’s ultimate agenda:

“Global warming is phony science that was concocted to justify implementation of an international political agenda. The idea of using ‘man-caused global warming’ as a ‘surrogate for war’ and as a way to ‘destroy excess wealth’ originated in American and UN-related think tanks such as the Club of Rome back in the 60’s and 70’s. This pseudo-science is the centerpiece of a phony environmental movement by which the UN hopes to redistribute wealth in the world (toward the super-rich and away from the people) to de-industrialize

the industrialized countries (via the UN Kyoto Protocol-type carbon taxes, cap and trade schemes, etc.), and radically reduce the human population.”

Over 30,000 scientists say 'Catastrophic Man-Made Global Warming' is a complete hoax and science lie

**Global warming debunked: NASA report verifies carbon dioxide actually cools atmosphere**

NASA's Langley Research Center. As it turns out, all those atmospheric greenhouse gases that Al Gore and all the other global warming hoaxers have long claimed are overheating and destroying our planet are actually cooling it, based on the latest evidence
