## **FBI Agents Aren't Going to Stand For THIS...**

Christopher Wray has got to go, rank and file FBI agents declare. They totally lost confidence in their alleged Director. Investigators do their best to solve crimes while the honchos go around committing them, any time they want. The corruption has every bureau employee in the nation receiving death threats.

Agents howling in anger

Fox News is [reporting](#) that “*rank-and-file employees*” of the FBI are “*calling for Director Christopher Wray’s resignation.*” Disgraced Federal Bureau of investigation agent Timothy Thibault quietly retired last week as the bleep hit the fan. He denies any alleged “*bias*” in his decision to squash any sort of investigation into Hunter Biden’s laptop.

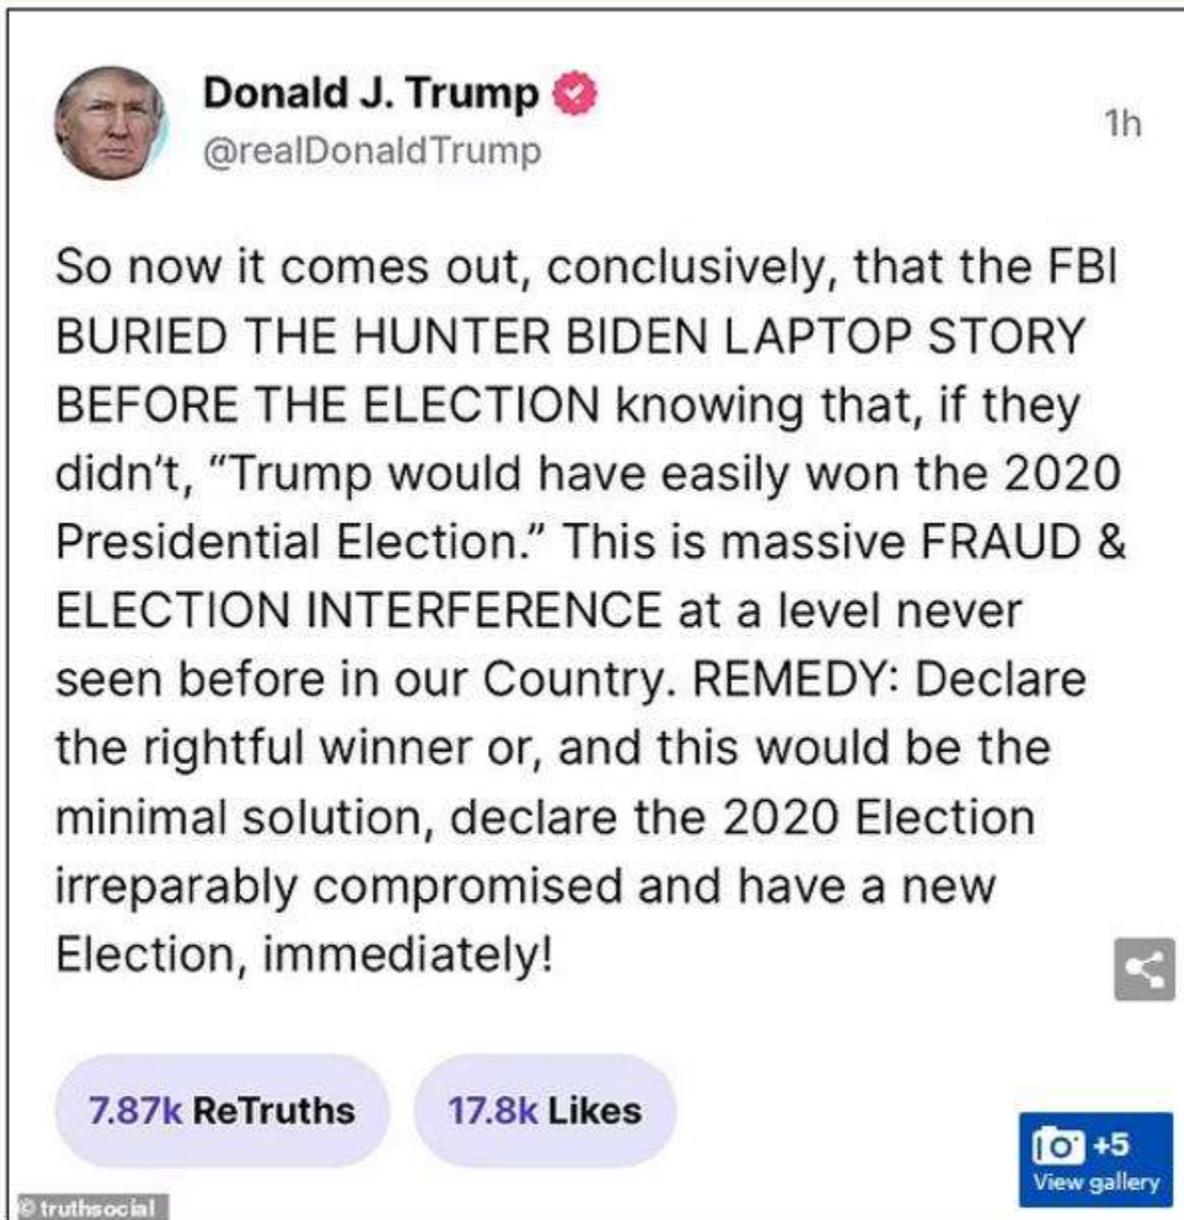

His honest fellow agents are furious that Wray didn’t even fire him. He quit but was due to retire anyway. That’s not anything close to “*disciplinary action.*” Sitting on that laptop allowed Joe Biden to steal the election from Donald Trump. Trump wants it back. Now. [Rumors](#) say he’s in the process of forming a government in exile until he gets back into the White House where he belongs.

Kurt Siuzdak, a lawyer who represents FBI whistleblowers, says “*I’m hearing from [FBI personnel] that they feel like the director has lost control of the bureau.*” Agents are wondering “*How does this guy survive? He’s leaving. He’s got to leave.*”

Each and every one of the ones he's talked to "*lost confidence*" in Wray. All the Deep State Director does "*is go in and say we need more training and we're doing stuff about it, or we will not tolerate it.*"

Meanwhile what the agents aren't doing is raiding Hunter Biden's house. Nobody was allowed to investigate a single one of the emails oozing out of the laptop that indicate Hunter was peddling access to Joe Biden and doing seriously compromising things with Russians, Chinese, Ukrainians and probably others.

The tweet text reads: "So now it comes out, conclusively, that the FBI BURIED THE HUNTER BIDEN LAPTOP STORY BEFORE THE ELECTION knowing that, if they didn't, 'Trump would have easily won the 2020 Presidential Election.' This is massive FRAUD & ELECTION INTERFERENCE at a level never seen before in our Country. REMEDY: Declare the rightful winner or, and this would be the minimal solution, declare the 2020 Election irreparably compromised and have a new Election, immediately!" That would have been useful information to know before the election in 2020. Donald Trump and at least half of America agree it would have changed the outcome completely.

Politicization at the top

Former agent Siuzdak told reporters at the New York Post he *“left his job as an FBI agent after almost 25 years last March because of alleged politicization at the top and said FBI leaders aren’t being held accountable.”* Other agents feel the same way. Charles Grassley and Jim Jordan have lined up a whole collection of whistleblowers.

They’ve *“said in disclosures that Wray often failed to take action after being notified about problems within the bureau, including claims of being forced to sign false affidavits and sexual harassment claims.”* When you run the FBI you’re allowed to make the laws up as you go along.

Earlier this year, Iowa Senator Charles Grassley accused Thibault *“of ‘improper conduct’ over what he alleged was a widespread effort to shut down the Hunter Biden investigation amid the 2020 election.”* That’s putting what he did mildly. He told agents not to even look at the laptop

and did his best to kill the investigation permanently before it even began.

*“[T]he allegations provided to my office appear to indicate that there was a scheme in place among certain FBI officials to undermine derogatory information connected to Hunter Biden by falsely suggesting it was disinformation,”* Grassley noted.

A formal statement from the agents was issued to the Times. *“The men and women of the FBI work hard every day to protect the American people and uphold the Constitution.”* That’s why they’re so furious with their corrupt leadership. *“All employees are held to the highest standards of professional and ethical conduct, and we expect them to focus on process, rigor, and objectivity in performance of their duties.”* Even folks like Christopher Wray.

*“Allegations of misconduct are taken seriously and referred to the Inspection Division or appropriate investigative body.”* Well, they’re supposed to be. *“In reality, the FBI is comprised of 37,000 employees who do it the right way on a daily basis to keep our nation safe by fighting violent crime, preventing terrorist attacks and defending America from espionage and cyber threats.”* Then their supervisors illegally weaponize

the bureau against a political opponent, just because they can. These agents aren't going to stand for it.
